

SPECTRUMETRIX™

THE GAMING INDUSTRY DATA SOURCE™

Spectrumetrix US Sports Betting Report™

- ◆ Our successful **Spectrumetrix™** premium subscription service that provides monthly, property-level performance data for all US commercial gaming jurisdictions, is currently used by casino operators, analysts, regulators, suppliers, law firms and other gaming-related professionals **to benchmark and analyze slot, table game, poker, simulcast and igaming revenues.**
- ◆ The **Spectrumetrix™ Sports Betting Report** provides timely detailed data market-by-market:
 - ◆ Handle
 - ◆ Win
 - ◆ Hold
 - ◆ Online vs. On-Premise Breakouts
 - ◆ Number of Bets
 - ◆ Results Breakdown by Sport

A service of:

© 2018 Management Science Associates, Inc. All rights reserved.

- The Spectrumetrix US Sports Betting Revenue Analysis is based on data released by the various state's Gaming Control boards.
- If the state does not report a certain type of data that other states do, then the state and its properties will not be displayed in the analysis for the data type.
- If the state reports data at an aggregated regional or jurisdictional level rather than at a property level, then this data is not used.
- As more states permit Sports Betting (and as more properties offer Sports Betting), the properties in those states will be added to this analysis.
- We calculate the market share value for a property using its sports betting win as a percentage of its market's total sports betting win. The market share value for a market is a percentage of the entire country's sports betting win.
- Fair Share represents how well a property/market performs compared to their peers. The Fair Share calculation includes the individual performance of a casino, the number of properties in the market, and the total sports betting win for the market. If a property has its fair share larger than another, it generally implies that this property is over performing its competitors from the same market.
- In addition to percentage variance amounts, red down arrows illustrate reductions of 5 percent or more, green up arrows show increases of 5 percent and up, and angled yellow arrows mark changes of less than 5 percent.
- Spectrumetrix subscribers have the ability to manipulate the data. This feature may help with benchmarking, as well as allowing for further exploration and deeper dives into the data. To view this information dynamically click the "Open in MySpectrumetrix" button found on the lower left side of most of the reports.
- Each sheet in the Excel file is formatted to print, while some print buttons have been added for convenience (macros must be enabled to use this feature).
- We welcome and value your feedback concerning this Spectrumetrix report. Please contact us with any questions, comments, or concerns. Thank you.
